

**Simplify
governance.
Strengthen ESG
compliance.
Move faster
globally.**

Governance built for energy complexity

Energy companies operate in some of the most heavily regulated and operationally complex environments. From joint ventures to multinational subsidiaries, Athennian gives energy firms the tools to centralize governance, maintain ESG and financial compliance, and access reliable entity data across jurisdictions.

Solving governance challenges in energy

Complex Subsidiary & JV Structures

Managing legal entities across cross-border projects and regulatory zones increases administrative overhead and risk.

Evolving ESG & Regulatory Pressures

Sustainability mandates and jurisdictional filings require consistent, accurate and timely data.

Disconnected Teams & Systems

Legal, compliance and finance teams often work with fragmented tools that slow down collaboration and execution.

What Athennian delivers

- **Centralized Subsidiary Management**

Consolidate governance across all energy assets, joint ventures and legal entities on one platform.

- **Automated Compliance & ESG Workflows**

Ensure timely submissions and audit readiness with built-in tracking and reporting for local and international regulatory requirements.

- **Real-Time Structure Visibility**

Access up-to-date ownership and compliance views to support strategic planning and operational moves.

- **Secure, Role-Based Collaboration**

Allow internal teams and external counsel to access the right information without compromising data integrity.

Platform features

Centralized governance of multinational subsidiaries and joint ventures

Dynamic ownership and structure charts for fast insight

Automated workflows for ESG, regulatory, and tax compliance

Secure document management with version history

Granular access permissions and complete audit trails

Integration with enterprise systems across finance and operations

Results that matter

- ✓ Reduced risk of non-compliance across ESG and financial frameworks
- ✓ Faster decisions in project development, divestiture and restructuring
- ✓ Stronger collaboration between legal, finance and external partners
- ✓ Reliable data for operational control and stakeholder reporting
